There are very few lake front properties anywhere that combine acreage, a natural setting with mature trees, granite outcroppings, and birds eye views together with an architecturally inspiring home. This is one of the rare ones that does all three. So let's begin. The previous owners purchased the property and one of first actions they took was to meet with an architect because this property is so special. When the architect visited the site she was so impressed she said she will design a home that will perfectly complement a perfect property. From the walls of windows to the ceilings twenty feet high and everything in between, this home is magnificent in every way. The master suite is superb with a luxurious bath with makeup area, a private terrace overlooking the water, a fireplace and a private study. There are two en suite guest bedrooms and they all overlook the two story great room. The ground level features full living quarters with a second kitchen, living room, dining room, fireplace, a huge bedroom and another full bath. The current owners have improved this property even more with a magnificent designer kitchen, a beautiful boat house with sundeck and boat lift and newer heating and cooling systems. The highlight when you walk the grounds is the stunning landscaping and hardscaping that was recently completed. This professionally designed concept involved many tradesmen with a variety of skills. And after more than three years of work and more than one million dollars the results are truly magnificent. These are just a few of the many details you'll appreciate when you visit this exceptional property. Contact Chris Edwards for a personal viewing. Sellers request qualified buyer only please.
